Pod Drive benefits

The Cummins/Zeus package provides many benefits: a fully integrated propulsion, transmission and steering system, with advanced computer control.

Operating benefits:

- Enhanced use of hull space, gaining a Utility Room
- Improved safety and convenience with fewer steps on the vessel
- Quiet operation with unobtrusive underwater exhaust
- Quiet operation with no engine hatch in the Salon, and a solid sole
- Engine service technicians do not need to enter the Salon
- Low vibration, with no long propeller shaft
- Sky Hook® dynamic positioning, holds station autonomously
- Effortless joystick docking, including moving ahead, astern, abeam, and yawing about the vessel's axis
- Improved efficiency offering higher speed and lower fuel consumption
- Reduced draft with smaller diameter propellers

Pods eliminate all equipment listed below = Reduced Maintenance:

- No Primary mufflers: underwater exhaust via the pod reduces noise and saves space in the engine room
- No Bow or stern thrusters, and associated zincs, batteries and charger, reduced drag
- No Rudders, rudder actuator, rudder posts, zincs, rudder bearings and seals
- No Autopilot actuator, and associated hydraulic systems or separate autopilot controls. (These are integrated into the Zeus controller)
- Reduced need for critical engine alignment, jack shaft is connected via a U-joint
- No Underwater propeller shafts and zincs
- No Dripless shaft seals or packings
- No Shaft logs
- No Cutlass bearings
- No Struts

Maintenance

- Annual servicing: hauling the boat, oil sampling and analysis, changing the oil, replacing anodes, checking the seals, checking the heat exchangers. (For full details refer to the Zeus service manual)
